Benchscope

About Benchscope

Benchscope is a UK life sciences discovery platform built to make the sector easier to navigate.

It brings together company profiles, sector categories, location data, jobs and ecosystem information in one searchable directory and map, helping users find relevant companies and better understand the UK life sciences landscape.

Launched in 2026, Benchscope includes over 1,000 hand-curated company profiles spanning biotech, genomics, research tools, software, CROs, diagnostics, drug discovery, cell and gene therapy, synthetic biology and the wider life sciences ecosystem.

Benchscope Features

- **Directory**

Search over 1,000 UK life sciences companies by category, focus area, region and keyword.

- **Interactive map**

Explore company locations and regional clusters across the UK.

- **Company profiles**

View concise summaries, focus areas, locations and ecosystem links.

- **Focus area discovery**

Browse specialist areas including biotech, genomics, diagnostics, CROs, drug discovery and synthetic biology.

- **Jobs board**

Connect life sciences companies with relevant candidates.

- **Sector insights**

Highlight companies, regions, categories and emerging areas of activity.

- **Visibility**

Enhanced profiles, stronger placement and targeted sponsorship opportunities.
